convention

Exhibition and Sponsoring Brochure

The Swiss NanoConvention (SNC) brings together Swiss and international leaders from science and industry in the field of nanotechnology, key figures in innovation and technology, entrepreneurs, investors, administrators and politicians. It is built to be a platform for connecting people, networking, debating and exchanging ideas – or generating new ones. Key players are able to gather the best available information on the potential, but also on the risks of one of the key emerging technologies of the 21st century, and its opportunities for innovative technologies, products and services. SNC topics include Nano for ICT, the life sciences, optics, metrology, energy and materials for a sustainable development. The two-day program will feature plenary talks, topical sessions, discussion platforms and ample opportunities for in-depth and informal networking. A poster session is also planned. In short: The Swiss NanoConvention is the prime showcase for nanotechnology in Switzerland, jointly organized by the «who-is-who» in the Swiss “nano” scene. It is the venue for meeting the great minds in nanoscience and -technology.

An important feature of SNC 2015 will be the exhibition of related equipment, products, software and services, which will be held in conjunction with the conference. We are also proposing an attractive sponsoring program. As an exhibitor or sponsor, you will get an opportunity to:

- Present your company and products to students and professionals from research and industry in Switzerland
- Increase your visibility and recognition in this community

The conference program and layout have been structured to maximize the opportunity for participants to visit the technical exhibition during coffee breaks and poster sessions. We recommend you to join our exhibition and sponsoring program.

Michel Despont  
Conference Chair
